Movement Type:
Spontaneous

Movement Trigger:
Fear of Attack

OVERVIEW

The lingering conflict in Nigeria's North East Zone has been the major cause of widespread population displacement. Over 2 million persons have been forced to leave their areas of residence in search of safety and security in neighbouring Wards and LGAs.

On 01 and 02 March 2021, a Non-State Armed Group (NSAG) carried out an attack in Dikwa LGA, leading to a substantial wave of population displacement. Following the attack, multiple flow monitoring assessments were conducted by DTM field staff with the purpose of informing the humanitarian community and government partners, and enabling targeted response. Flash reports utilise direct observation and a broad network of key informants to gather representative data and collect information on the number, profile and immediate needs of the affected population.

As a result of the attack, during the month of March 2021, a total of 4,994 individuals was displaced from Dikwa LGA towards the LGAs Jere and Maiduguri M.C. They arrived at Dikwa Motor Park (Dusuman Ward in Jere LGA) from various camps and communities in Dikwa LGA. As presented on the map below, their intended destinations were locations in the LGAs Jere and Maiduguri M.C. in Borno State.

Sectorial information on departure location - Dikwa

Food Security

The situation of food insecurity resulting from the attack has been attended to by Care international in both host communities and camps. Because of the food support, currently less people are begging.

Shelter

An estimate of 209 shelters were damaged in the Alhaji Bashir Camp and 236 shelters were damaged in Shehuri Modu Kasa Camp. The residents are putting efforts into repairing the damaged shelters themselves.

NFI

In a bid to reduce the gap in the need for NFIs, Care international and National Youth Council of Nigeria (NYCN) distributed NFIs to a targeted vulnerable set of beneficiaries in Mohammed Kyari Camp and Ajari Camp. This is in addition to the camps attended by GISCOR targeting those who lost their belongings to fire during the attack.

Health

Of the 10 existing clinics in Dikwa, only four are currently operational. Two out of the clinics are managed by ICRC volunteers and are located in 1000 Camp and Shehu Masta Camp offering a bare minimum of services. The other two clinics are located in the host community. One is managed by UNICEF community based volunteers while the other is managed by the local government health workers. However, it is impossible for these clinics to address the needs of the displaced population in the LGA and there is an urgent need for support.

Furthermore, there is a need for psychosocial support and counseling after the traumatizing attack and the widespread loss of properties.

WASH

Residents of Ministry of Works Camp were able to fix the damaged boreholes. This was achieved by contributions made by residents of the camp. Sangaya and Agric Camp are in dire need of water as they have resulted to purchasing water. The lack of running water has severely affected the hygiene in the camp.

The toilets in Klagaru, Sangaya and Agric Camps are due for dislodgement. If no action is taken in the concerned camps, a health related outbreak may be expected. Toilets are due to fill up in the coming days as there is no routine removal since the attack.
