Over the past week, the top five destinations (districts) for newly displaced individuals were Aley (22%), Chouf (18%), Akkar (15%), El Meten (7%), and Jbeil (6%).

The increase in total number of IDPs may not always align with the number of new arrivals within a specific period. This difference often occurs when Key Informants (KIs) report cumulative totals that include previously uncounted IDPs.

## Methodology

The objective of the Mobility Snapshot is to support the humanitarian community in preparedness and response planning. Multi-layered data is routinely captured through Rounds using a suite of methodological tools designed to track and monitor displacement. These tools are in line with the [DTM Global Methodological Framework](#).

Data is collected nationwide through a combination of face-to-face and remote data collection methods, utilizing a network of over 50 enumerators and 1,500 key informants. These key informants consist of government officials, mukhtars, community representatives, and neighborhood focal points.
