

Context and methodology

This report aims to provide a holistic view of the forced displacement situation in Haiti. Since August 2022, the Directorate General of Civil Protection (DGPC) and the IOM's Displacement Monitoring Matrix (DTM) have been carrying out periodic assessments of areas hosting displaced populations. Data is collected through direct observations as well as interviews with key informants. The last exercise of these evaluations ([Round 5 – December 2023](#)) indicated that 313,901 people were internally displaced in Haiti (in 7 districts evaluated out of the 10 in the country). This new report indicates the presence of 362,551 internally displaced people, 15% more than in the round 5.

District	Data collection period	District	Data collection period
Artibonite	10 – 16 December 2023	West	20 January – 03 March 2024
Centre	16 – 19 December 2023	South	24 – 30 November 2023
Grande Anse	16 – 24 November 2023	South-East	20 – 28 November 2023
Nippes	17 – 23 November 2023
