Host locations of Internally Displaced Persons (IDPs) and Returnees former IDPs

Key figures

494 assessed locations

72% through field interviews 28% through phone interviews

1,334 key informants interviewed

33,665 Internally displaced households

146,584 Internally displaced Persons

Areas	# total IDPs	# of IDPs in host families	# of IDPs in IDP sites	# of sIDPs sites
PAPMA*	139,853	59,262	80,591	73
Outside PAPMA	6,731	6,491	240	1
Total western district	146,584	65,753	80,831	74

^{*} PAPMA = Port-au-Prince Metropolitan Area

Increase in the proportion of IDPs in sites in the PAPMA compared to those in host families (45% of IDPs were in sites in round 4; this percentage increased to 58% in Round 5).

See page 5 for more details

4,662 Returned households (Former IDPs)

26,301 Returned individuals

97% in the PAPMA 3% in areas outside PAPMA

Variations of IDPs per neighborhood, between Rounds 5 and 4

Number of neighborhoods per variation

127

Top 5 of neighborhoods where IDP numbers have increased significantly

Municipality	Neighborhood	Round 4	Round 5	Variation in IDP numbers
Port-au-Prince	Bas Peu de Chose	0	15,664	+ 15,664
Port-au-Prince	Champ-de-Mars	0	10,620	+ 10,620
Port-au-Prince	Bois Verna	0	2,650	+ 2,650
Cité Soleil	Wharf Jeremie	2,911	4,829	+ 1,918
Tabarre	Caradeux	60	1,887	+ 1,827

A total of 127 neighborhoods in the PAPMA have not seen any change in the number of IDPs they host. Seven (7) neighborhoods, mainly located in the municipality of Port-au-Prince, experienced a significant increase. Particularly, neighborhoods of Bas Peu de Chose, Champs-de-Mars and Bois Verna, to which the majority of people who fled attacks of August 2023 in Carrefour-Feuilles and Savanes Pistaches had taken refuge.

On the other hand, the number of IDPs fell by more than 1,000 people in 12 neighborhoods. Results seem to indicate that these people left the PAPMA to take refuge in provinces. DTM is conducting assessments in provinces to provide a national wide view of the displacement situation in Haiti.

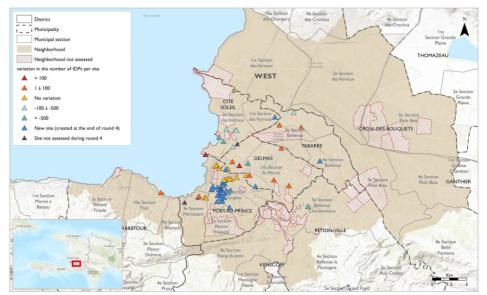

ssment of the displacement situation in the Western District (Round 5)

Dashboard #5

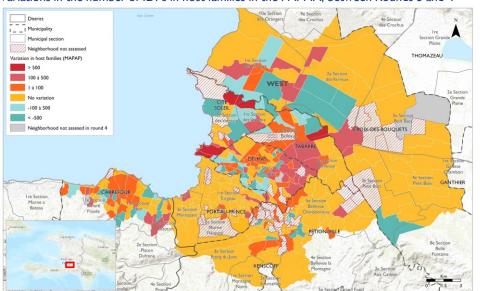

Data Collection: 12 October to 10 November 2023 Publication: 20 November 2023

Variations in the number of IDPs in sites of the PAPMA, between Rounds 5 and 4

Variations in the number of IDPs in host families in the PAPMA, between Rounds 5 and 4

Variations in the number of IDPs, between Rounds 1 and 5 in the West and the PAPMA in particular

146,584 District of West Round 5 +2% 139,853 +7% (Nov 2023) **PAPMA**

> The increase in the number of IDPs is mainly due to armed attacks which occurred in Carrefour-Feuilles and Savanes-Pistaches neighborhoods in August 2023.

143,209 **District of West** Round 4 +12% (June 2023) 130,884 **PAPMA**

> The number of IDPs in the West district increased by 12%, due to the extension of the assessment coverage area, floods of June 2023 and security incidents. The increase in the number of IDPs in the PAPMA alone was very slight, at 2%.

Round 3 **PAPMA** -18% (March 2023)

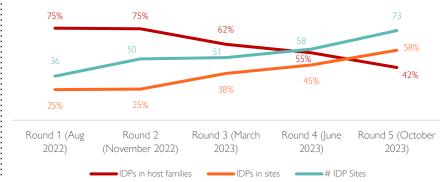

> This decrease was mainly due to a relative drop in security incidents in the PAPMA at the end of 2022 and the beginning of 2023. Thus, nearly 15,000 IDPs had returned home between the two rounds.

Round 2 155,166 **PAPMA** (Nov 2022)

> This significant increase is due to the deterioration of the general situation in the PAPMA following violent social protest movements, in particular due to the increase in fuel price

Round 1 87,895 **PAPMA** (Aug 2022)

Variations between Rounds 1 and 5 in the PAPMA: IDPs in host families vs. in sites and number of sites

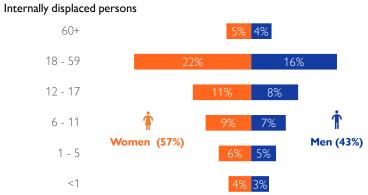

Western District (Round 5)

Dashboard #5 Data Collection: 12 October to 10 November 2023

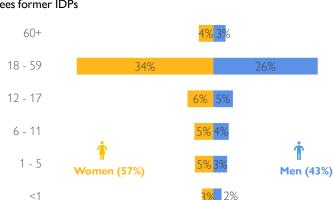

Returnees former IDPs

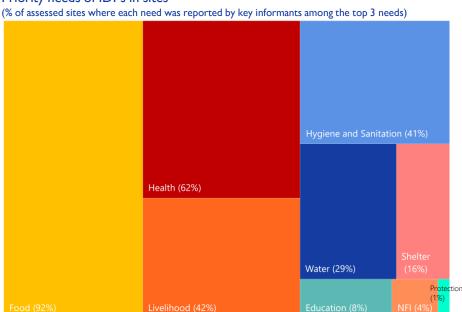

Reasons of the displacement and return

? → Reasons of IDPs' displacement	%
Attack / Violence	98%
Natural disaster	1%
Preventive displacement / Fear	1%

Reasons for return	%
Improved security conditions in returning areas	74%
Access to livelihoods in the returning area	16%
Increased insecurity in the host location	7%
Cohabitation issues with host communities in the host location	2%
Lack of humanitarian aid in the host location	1%

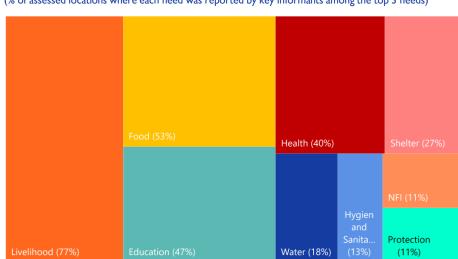

Priority needs of IDPs in sites

Priority needs of IDPs in host families

(% of assessed locations where each need was reported by key informants among the top 3 needs)

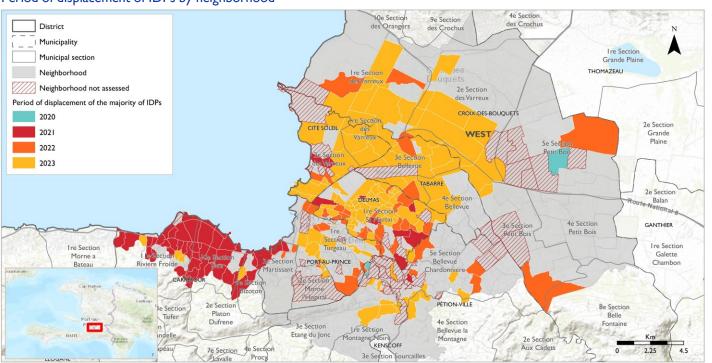

Western District (Round 5)

Dashboard #5 Data Collection: 12 October to 10 November 2023 Publication: 20 November 2023

Period of displacement of IDPs by neighborhood

The vast majority of IDPs were displaced either in 2022 (29%), or in 2023 (58%), particularly in August 2023 due to attacks which occurred in Carrefour-Feuilles and Savanes Pistaches, two neighborhoods located in the municipality of Port-au-Prince (see Emergency Monitoring report 22).

IDPs who were displaced since 2021 are mainly located in the municipality of Carrefour, which hosts 9 per cent of IDPs in the Western district,

Almost all returnees - Former IDPs (97%) returned to their places of origin in 2023. It should be noted that these returns are not necessarily sustainable due in particular to the volatility of the security situation.
