DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION ETHIOPIA

ROUND 13: SEPTEMBER - OCTOBER 2018

SOMALI REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

1,016,166 displaced individuals comprising 168,246 households in 388 displacement sites were identified in SOMALI region. These figures represent a decrease of 75,044 in the total individuals (-6.88%) an decrease of 11,280 households (-6.28%) and an increase of 3 sites (0.78%) since round 12 July/August 2018. 59.54% sites opened in 2017 and 13.14% opened in 2018. Conflict was the primary cause of displacement for an estimated 65.45% of the displaced population.

DEMOGRAPHICS: 52.17% of displaced individuals were female and 47.83% were male. 61.45% were younger than 18 years old. 8.57% were over 60 years old.

SHELTER: 324 sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: Only 4 sites meet SPHERE standards of access to over 15 liters of water per person per day. 241 (62.11%) displacement sites reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: 79 (20.36%) sites, representing 342,121 individuals, reported no access to food. 98.71% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Malaria was the primary health concern in this round of data collection with 137 sites reporting this.

EDUCATION: In 35.05% of sites 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 53.87% sites. Alternative basic education (ABE) is available at 131 sites.

COMMUNICATION: 44.33% of sites reported that Site Management were IDPs primary source of information followed by Authorities at 24.74% of sites. Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement. Figure 2 shows IDP numbers disaggregated by cause over time.

Figure 1: Trends in stock totals of displacement and new displacements from 2017 and 2018

Figure 2: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION ETHIOPIA ROUND 13: SEPTEMBER - OCTOBER 2018

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

Conflict has consistently been reported as the primary cause of displacement in the region (as indicated by figure 4). IDPs displaced in 2018 and before 2017 reported that conflict was the primary driver for their displacement. Climate induced displacement was the most prevalent form of displacement in 2017.

13.00% of IDPs reported being displaced previously. Furthermore, IDPs from 26 sites were leaving the current place of displacement. Of these, IDPs from 25 sites were going to the nearest village and IDPs from 1 site intended to return to their place of origin.

Regarding the duration of sites: 13.14% of all sites identified opened in 2018 while 59.54% opened between January and December 2017 and 27.32% of sites opened before 2017.

The majority of IDPs identified in the region were displaced to locations near their areas of origin. 62.36% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 58.17% were displaced within their zone of origin.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

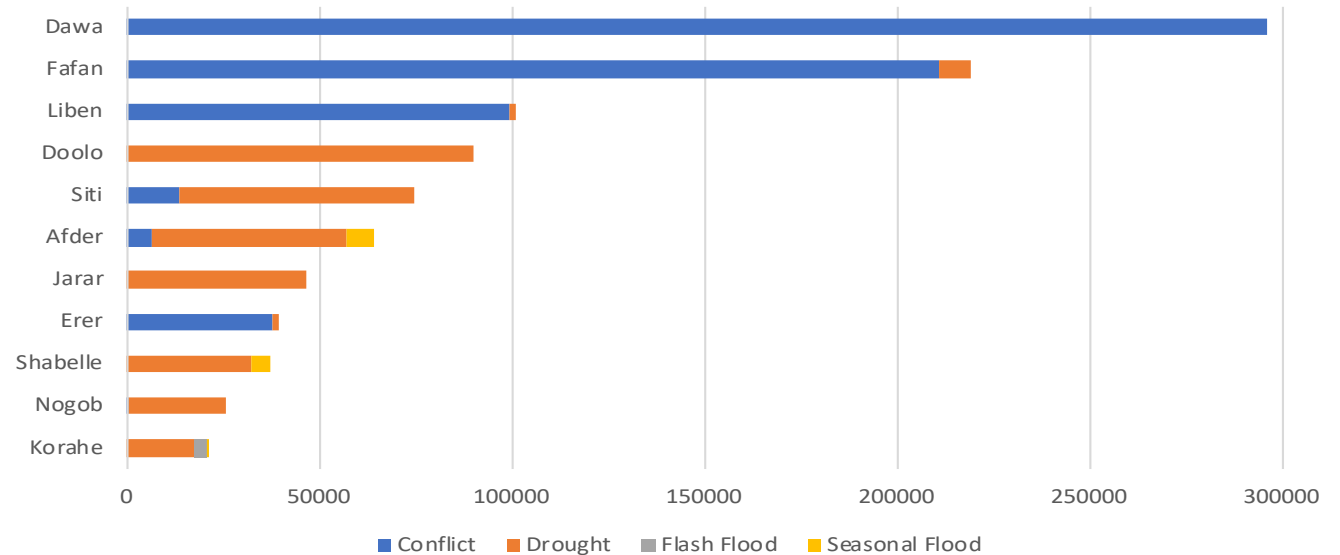

Figure 3: IDPs displaced by zone and cause of displacement

Duration	Conflict Induced	Climate Induced	Grand Total
Before 2017	252,221	68,844	321,065
During 2017	185,132	268,519	453,651
In 2018	227,692	13,758	241,450
Grand Total	665,045	351,121	1,016,166

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

ROUND 13: SEPTEMBER - OCTOBER 2018

DURABLE SOLUTIONS, VULNERABILITIES AND DEMOGRAPHICS

At 57.22% of sites IDPs foresaw a resolution to their displacement, while IDPs at 39.95% of sites did not. At the remaining sites key informants either did not know (2.84%), or were not asked the question in a previous round.

At 91.49% of sites IDPs prefer reintegration as a durable solution to their displacement while at 8.25% sites they prefer return. none of the assessed sites reported that IDPs prefer relocation. At 0.26% of sites this information is unknown.

Figure 5 shows the percentage of sites reporting various obstacles to returns, while figure 6 shows support IDPs need to return or reintegrate.

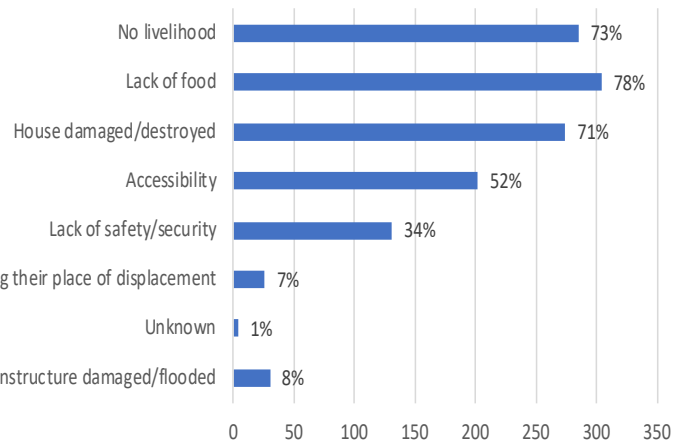

Figure 5: % Sites reporting obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

Figure 6: % Sites by support needed to return or reintegrate

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION ETHIOPIA ROUND 13: SEPTEMBER - OCTOBER 2018

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, thirteen rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.

Disclaimer: Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the household members of 20 randomly selected households from the site.

Displacement Tracking Matrix (DTM) conducted in collaboration with Danish Refugee Council (DRC)

DTM made possible thanks to the European Civil Protection and Humanitarian Aid Operations (ECHO), the Ethiopian Humanitarian Fund (EHF), the Office of United States Foreign Disaster Assistance (OFDA) and the Swiss agency for Development and Cooperation (SDC).

The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the Office of United States Foreign Disaster Assistance.

Boundaries

- International Boundary
- Regional Boundary
- Zonal Boundary
- Woreda Boundary

Sites by causes of displacement

- Conflict
- Climate induced

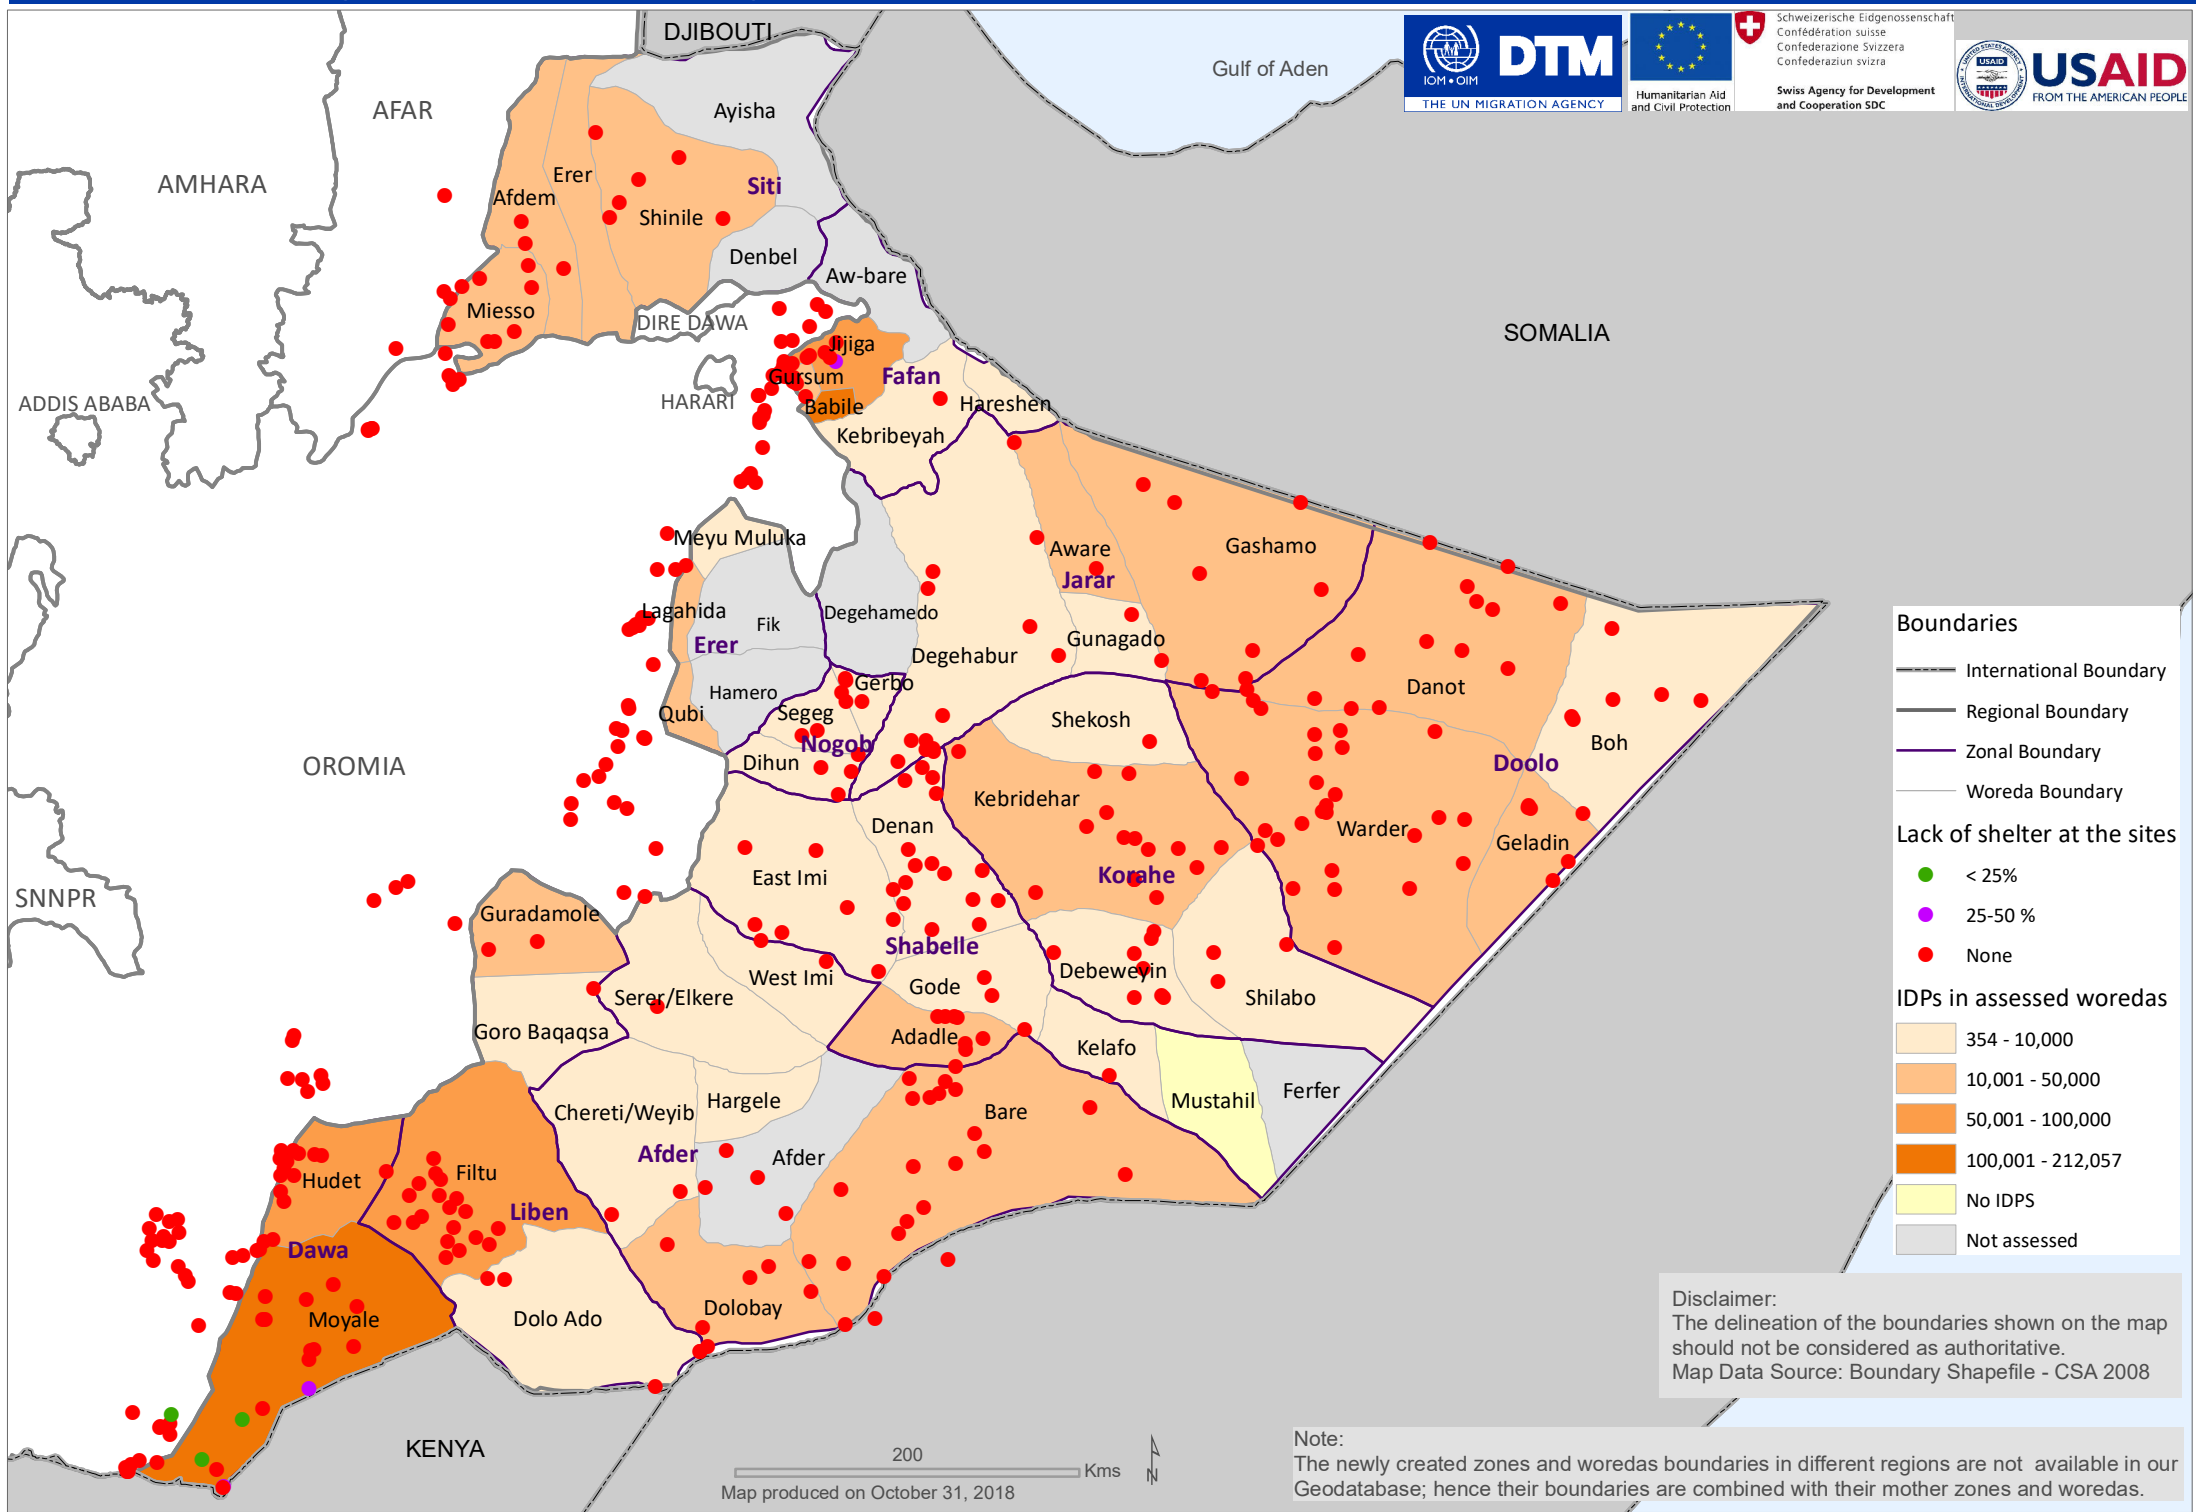

IDPs in assessed woredas

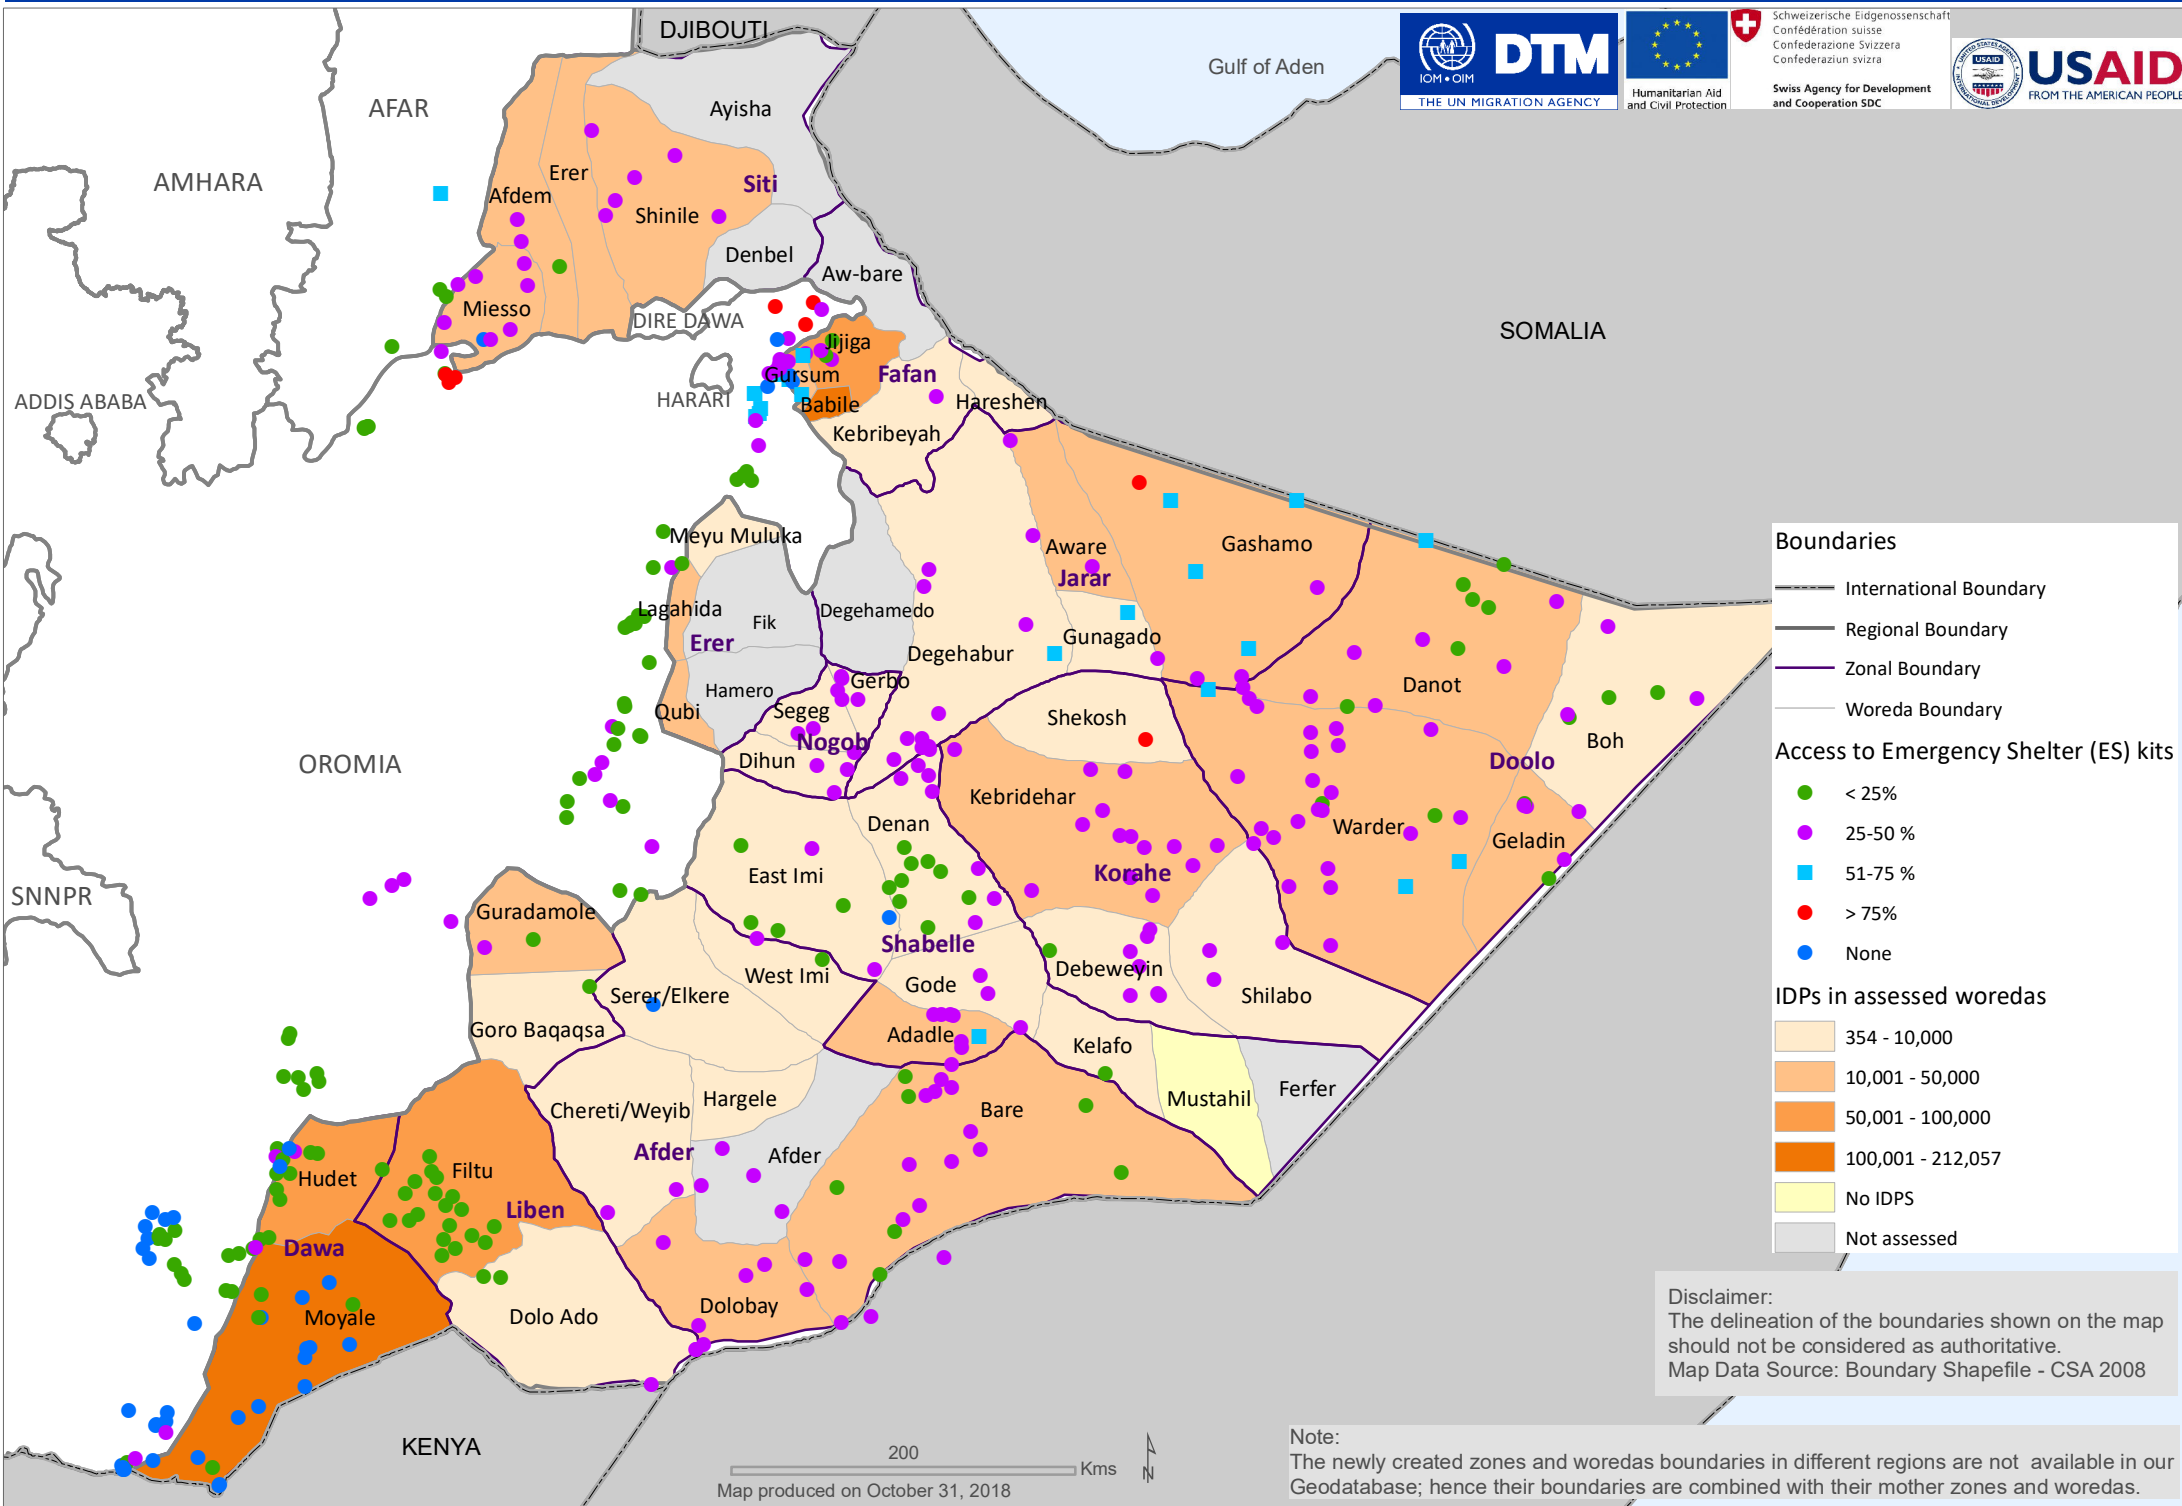

- 354 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 212,057
- No IDPs
- Not assessed

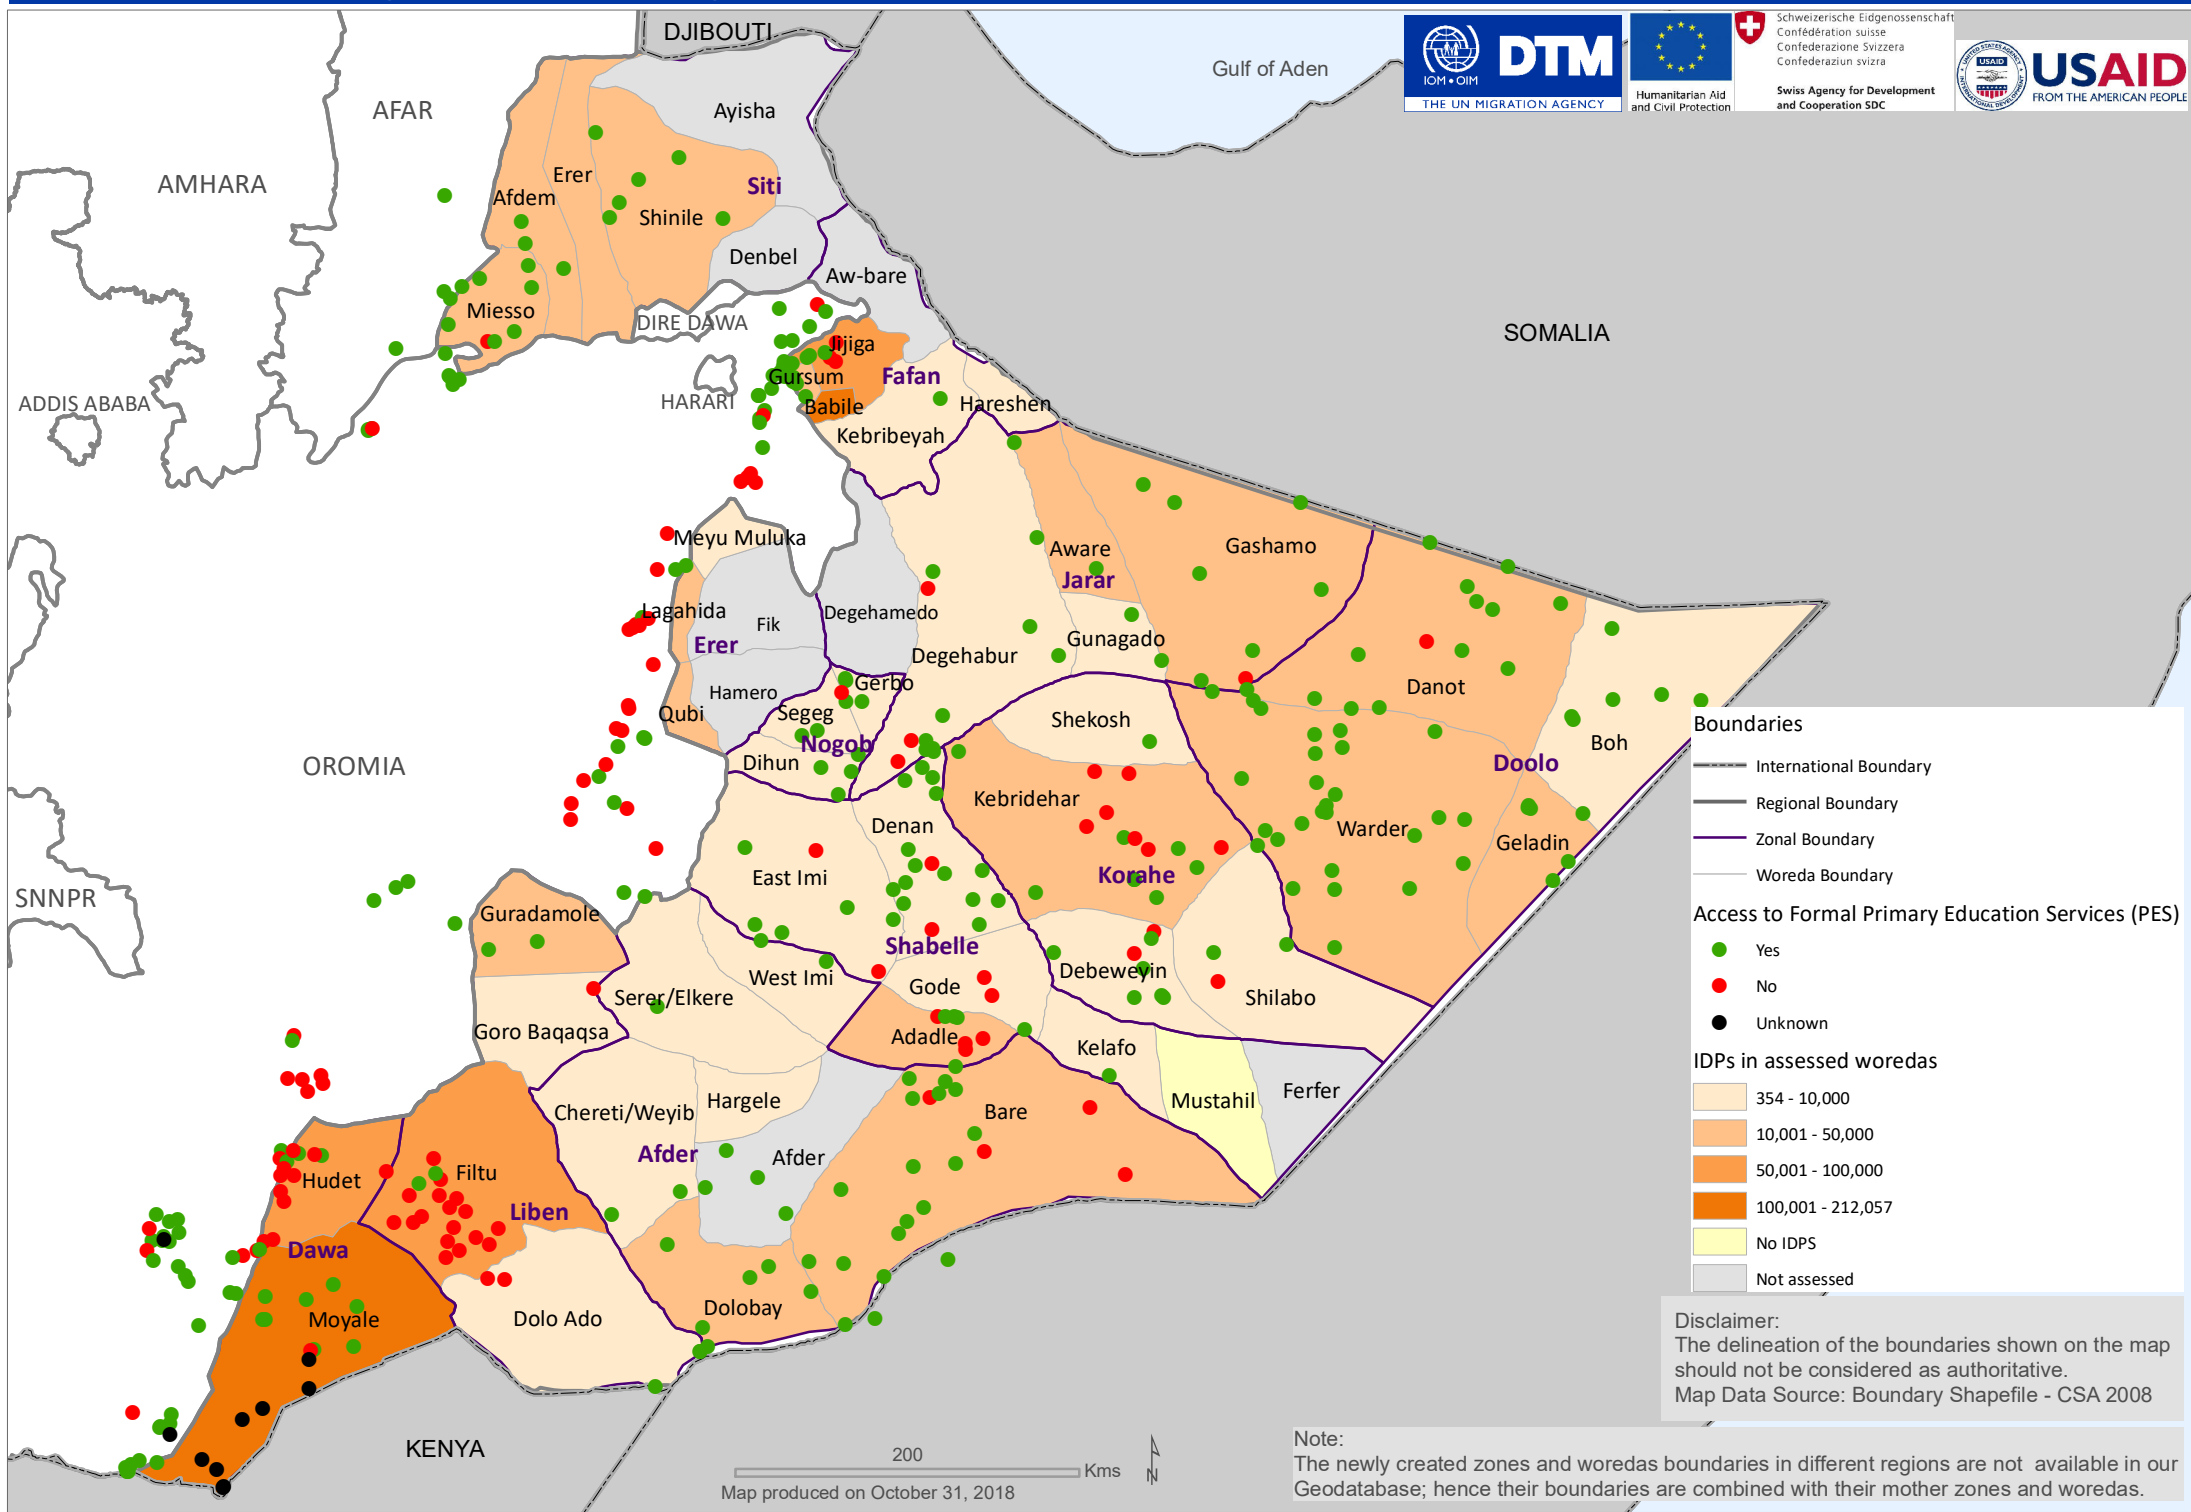

Disclaimer:
The delineation of the boundaries shown on the map should not be considered as authoritative.
Map Data Source: Boundary Shapefile - CSA 2008

Note:
The newly created zones and woredas boundaries in different regions are not available in our Geodatabase; hence their boundaries are combined with their mother zones and woredas.
