

**DISPLACEMENT TRACKING MATRIX (DTM) SOMALI, ETHIOPIA
ROUND 11: MAY/JUNE 2018**

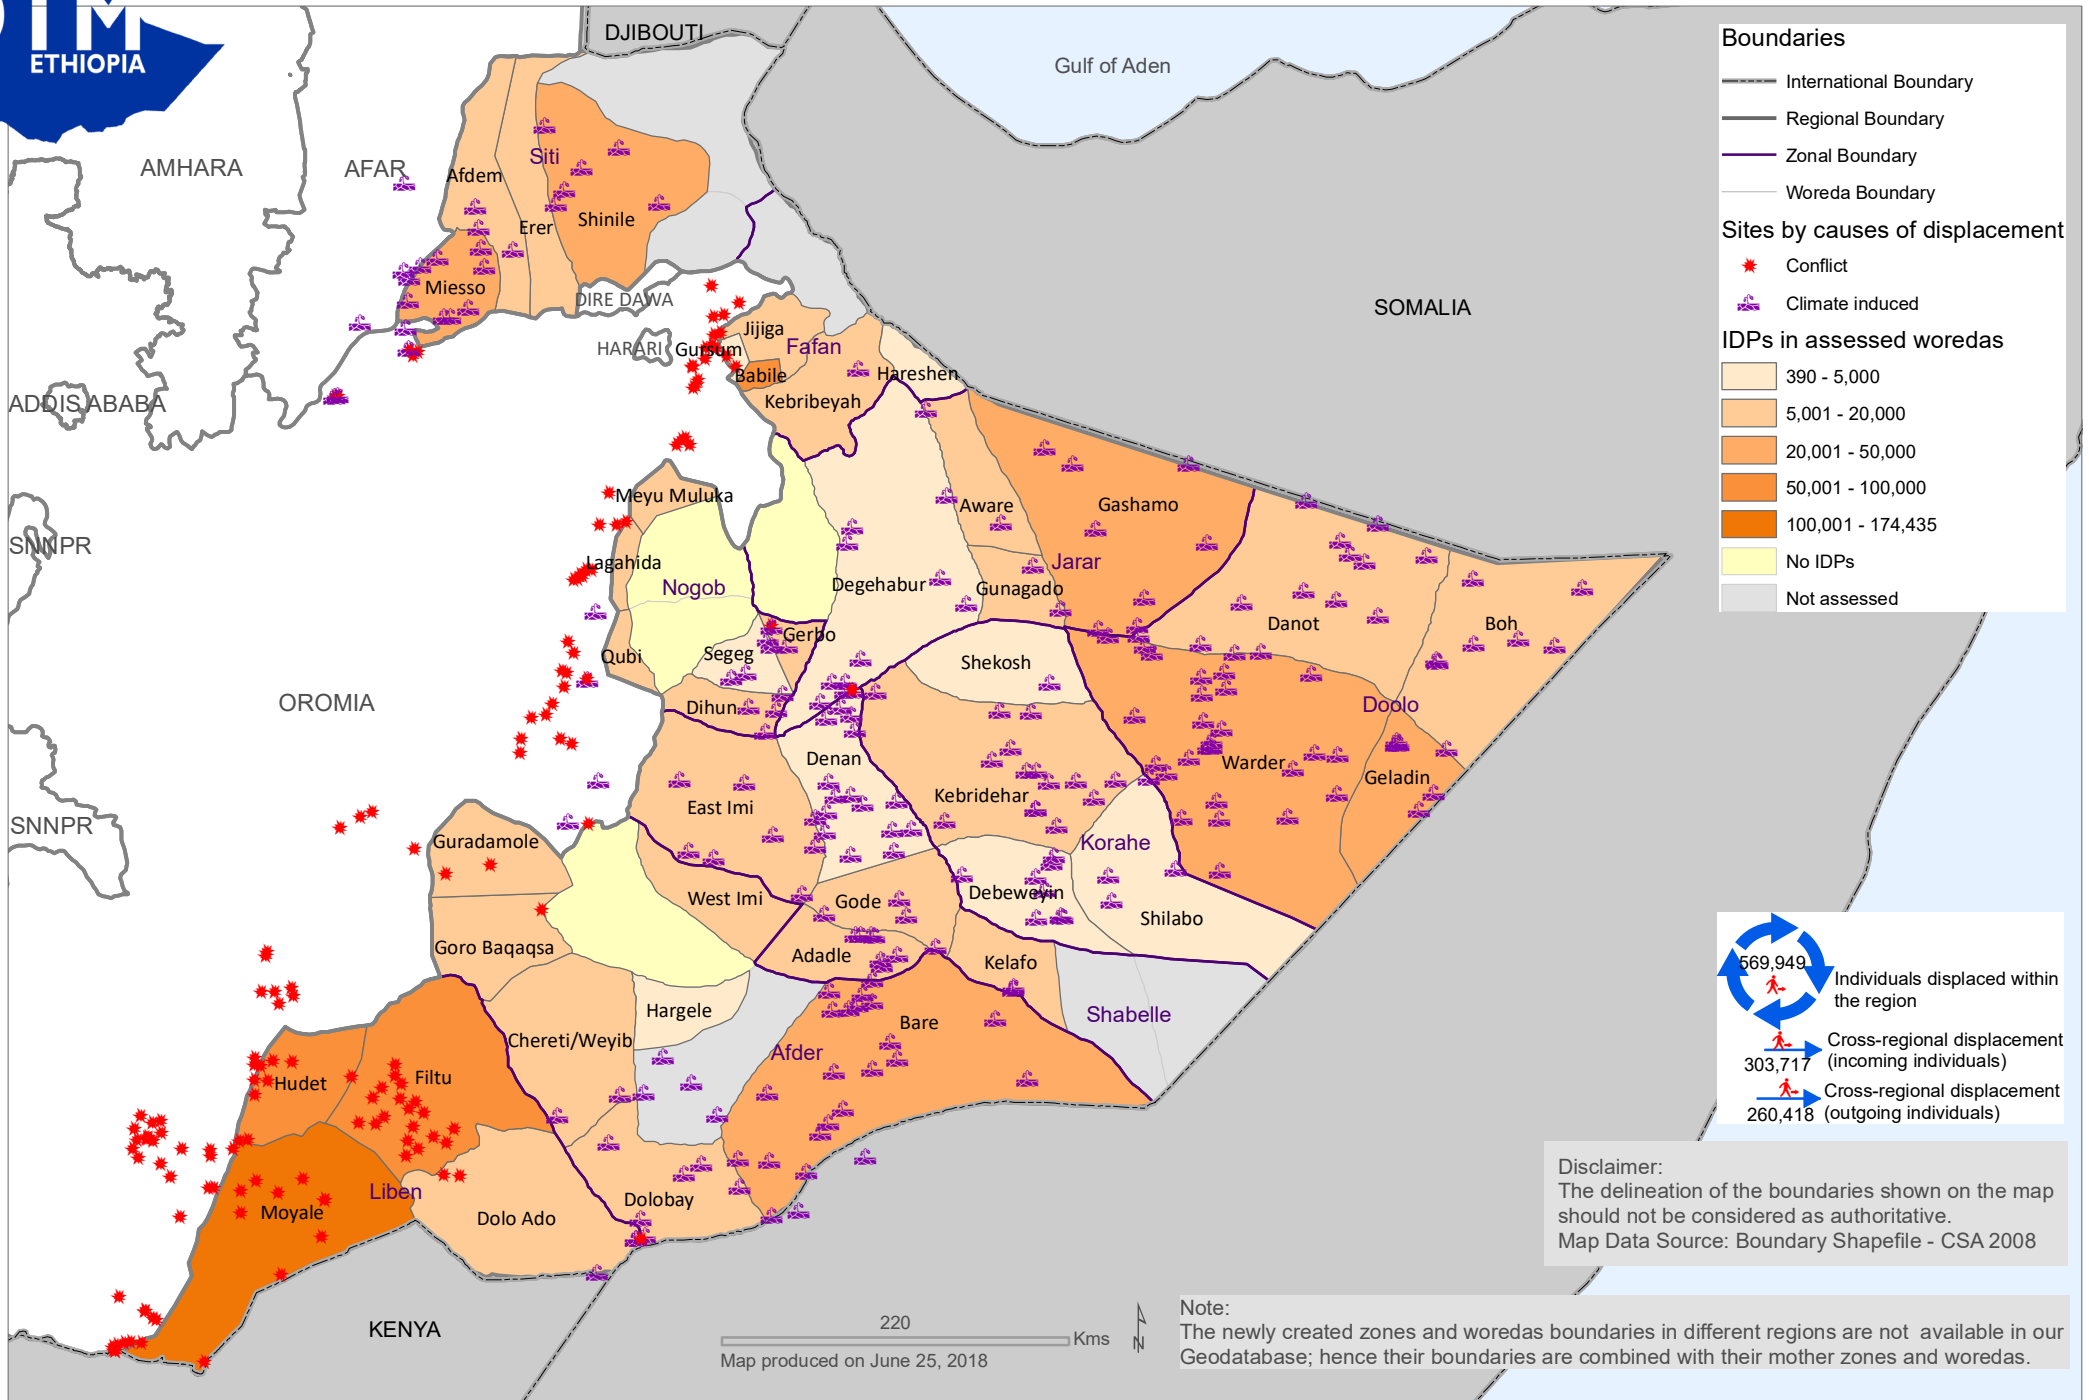

Summary of key findings

DATE OF PUBLICATION: 15 JULY 2018

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI, ETHIOPIA ROUND 11: MAY/JUNE 2018

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION ETHIOPIA

ROUND 11: MAY - JUNE 2018

DTM IDP household figures in Elmahan site, Hudet woreda, Dawa zone are undergoing re-verification in a joint effort by IOM and the Regional Disaster Preparedness and Prevention Bureau (RDPPB).

Somali REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

873,666 displaced individuals comprising 142,014 households in 362 displacement sites were identified in Somali region*. These figures represent an increase of 109,521 in the total individuals (+14.33%) an increase of 14,715 households (+11.56%) and an increase of 15 sites (+4.32%) since round 10 (March/April 2018). 65.19% sites opened in 2017 and 5.80% opened in 2018. Conflict was the primary cause of displacement for an estimated 57% of the displaced population.

DEMOGRAPHICS: 51% of displaced individuals were female and 49% were male. 62% were younger than 18 years old. 9% were over 60 years old.

SHELTER: 308 sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: Only 7 sites meet SPHERE standards of access to over 15 liters of water per person per day. 256 (71%) displacement sites reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: 55 (15%) sites, representing 252453 individuals, reported no access to food. 96% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Malaria was the primary health concern in this round of data collection with 120 sites reporting this.

EDUCATION: In 27% of sites 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 252 sites. Alternative basic education (ABE) is available at 135 sites.

COMMUNICATION: 40% of sites reported that Site Management were IDPs primary source of information followed by Authorities at 31% of sites.

Figure 1 shows IDP numbers disaggregated by cause over time.

* There were 72 inaccessible sites in round 11.

SOMALI REGION IN CONTEXT

Dawa, Fafan, Liban, Erer, Siti and Afder zones were the areas most affected by conflict during the reporting period. In Fafan zone's Babile Woreda clashes over the rights to farmland were reported. In Tuliguled and Gursum woredas an active tribal conflict continues between the Gari and Jarso tribes. The conflict in Liban zone was reported in Dekasuftu, Karsadulla, Goorabaqaqsa & Gurdamole woredas but is now inactive. In Dawa zone's Moyale, and Hudat woredas active conflict continues between the Borena and Gare tribes, amongst others. In Erer/Nogob zone conflict between Somali and Oromo people was observed in Salahad, Lagahide, Kubi and Mayumuluko Woredas.

The primary zones affected by seasonal flooding during the reporting period were: Dawa, Liban, Shabelle and Afder. Woredas along the Shabelle, Ganale, Dawa and Weyib rivers were among the most affected. Other affected woredas include Kabridehar and Debeweyin in Korahe zone and Jigiga town in Fafan zone.

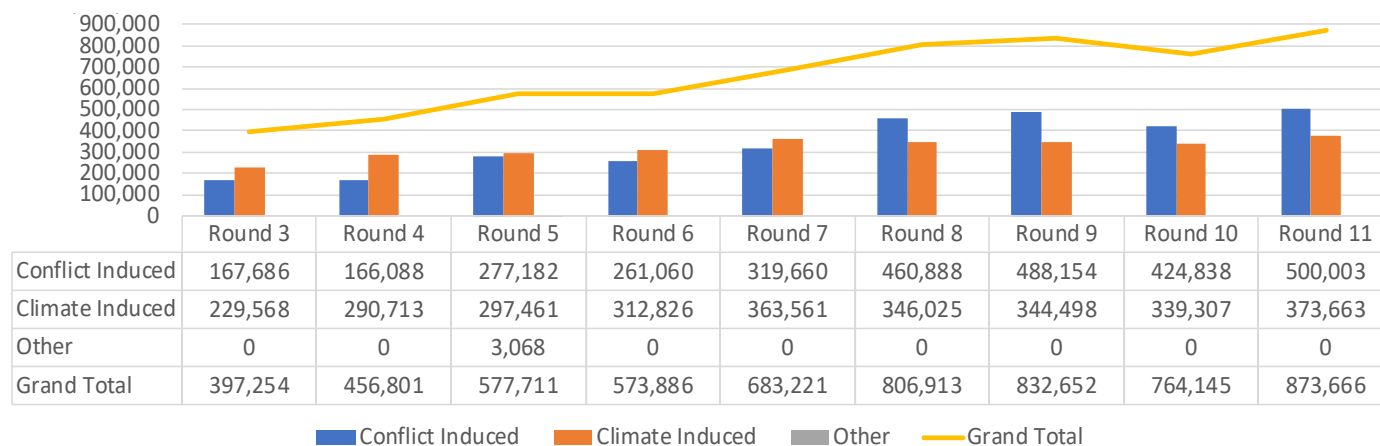

Figure 1: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION ETHIOPIA ROUND 11: MAY - JUNE 2018

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

At 70 sites new IDP arrivals were recorded in 2018. At 190 sites the last new arrivals were recorded in 2017. At the remaining sites the last new arrivals were recorded before 2017.

5.80% of all sites identified opened in 2018 while 65.19% opened between January and December 2017. 29.01% of sites opened before 2017.

Figure 2 shows the number of IDPs displaced by zone and cause of displacement. Figure 3 shows the distribution of IDPs by driver of displacement and time of displacement.

65.24% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 61.09% were displaced within their zone of origin.

0.17% (1467) of IDPs had reportedly been previously displaced. IDPs from 17 (5%) sites were leaving the site. Of these, IDPs from 12 sites were going to the nearest village and IDPs from 2 sites intended to return to their place of origin.

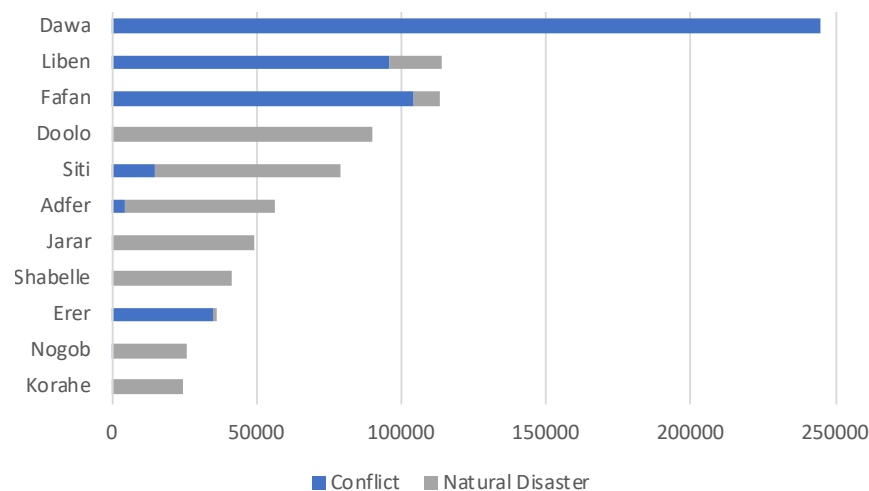

Figure 2: IDPs displaced by zone and cause of displacement

	In 2018	In 2017	Before 2017
Conflict	101,097	191,260	207,646
Natural Disaster	30,419	270,906	72,338

Figure 3: Distribution of IDPs by cause of displacement and time of displacement

ROUND 11: MAY - JUNE 2018

DURABLE SOLUTIONS, VOULNERABILITIES AND DEMOGRAPHICS

At 40.33% of sites IDPs foresaw a resolution to their displacement, while IDPs at 49.17% of sites did not. At the remaining sites key informants either did not know (10.50%), or were not asked the question in a previous round.

At 97.51% of sites IDPs prefer reintegration as a durable solution to their displacement while at 2.21% sites they prefer return. 0.28% of sites reported that IDPs prefer relocation.

Figure 4 shows the percentage of sites reporting various obstacles to returns, while figure 5 shows support IDPs need to return or reintegrate.

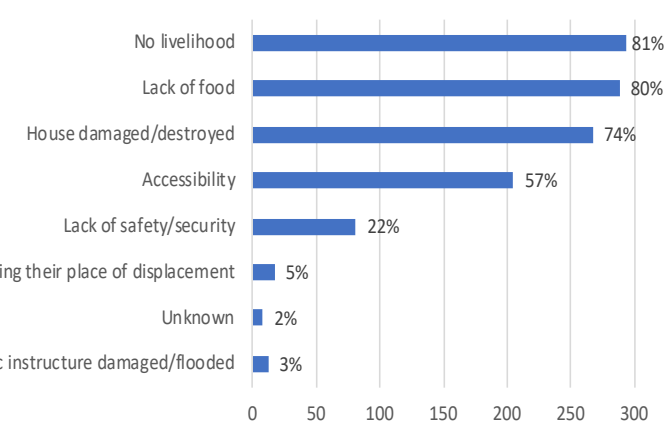

Figure 4: % Sites reporting obstacles to return

The demographic breakdown is shown in figure 6. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 7.

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION ETHIOPIA

ROUND 11: MAY - JUNE 2018

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, eleven rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.

FROM THE AMERICAN PEOPLE

DTM made possible thanks to the European Civil Protection and Humanitarian Aid Operations (ECHO), the Ethiopian Humanitarian Fund (EHF), the Office of United States Foreign Disaster Assistance (OFDA) and the Swiss agency for Development and Cooperation (SDC).

The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the Office of United States Foreign Disaster Assistance.

Boundaries

- International Boundary
- Regional Boundary
- Zonal Boundary
- Woreda Boundary

Sites by causes of displacement

- Conflict
- Climate induced

IDPs in assessed woredas

- 390 - 5,000
- 5,001 - 20,000
- 20,001 - 50,000
- 50,0001 - 100,000
- 100,001 - 174,435
- No IDPs
- Not assessed

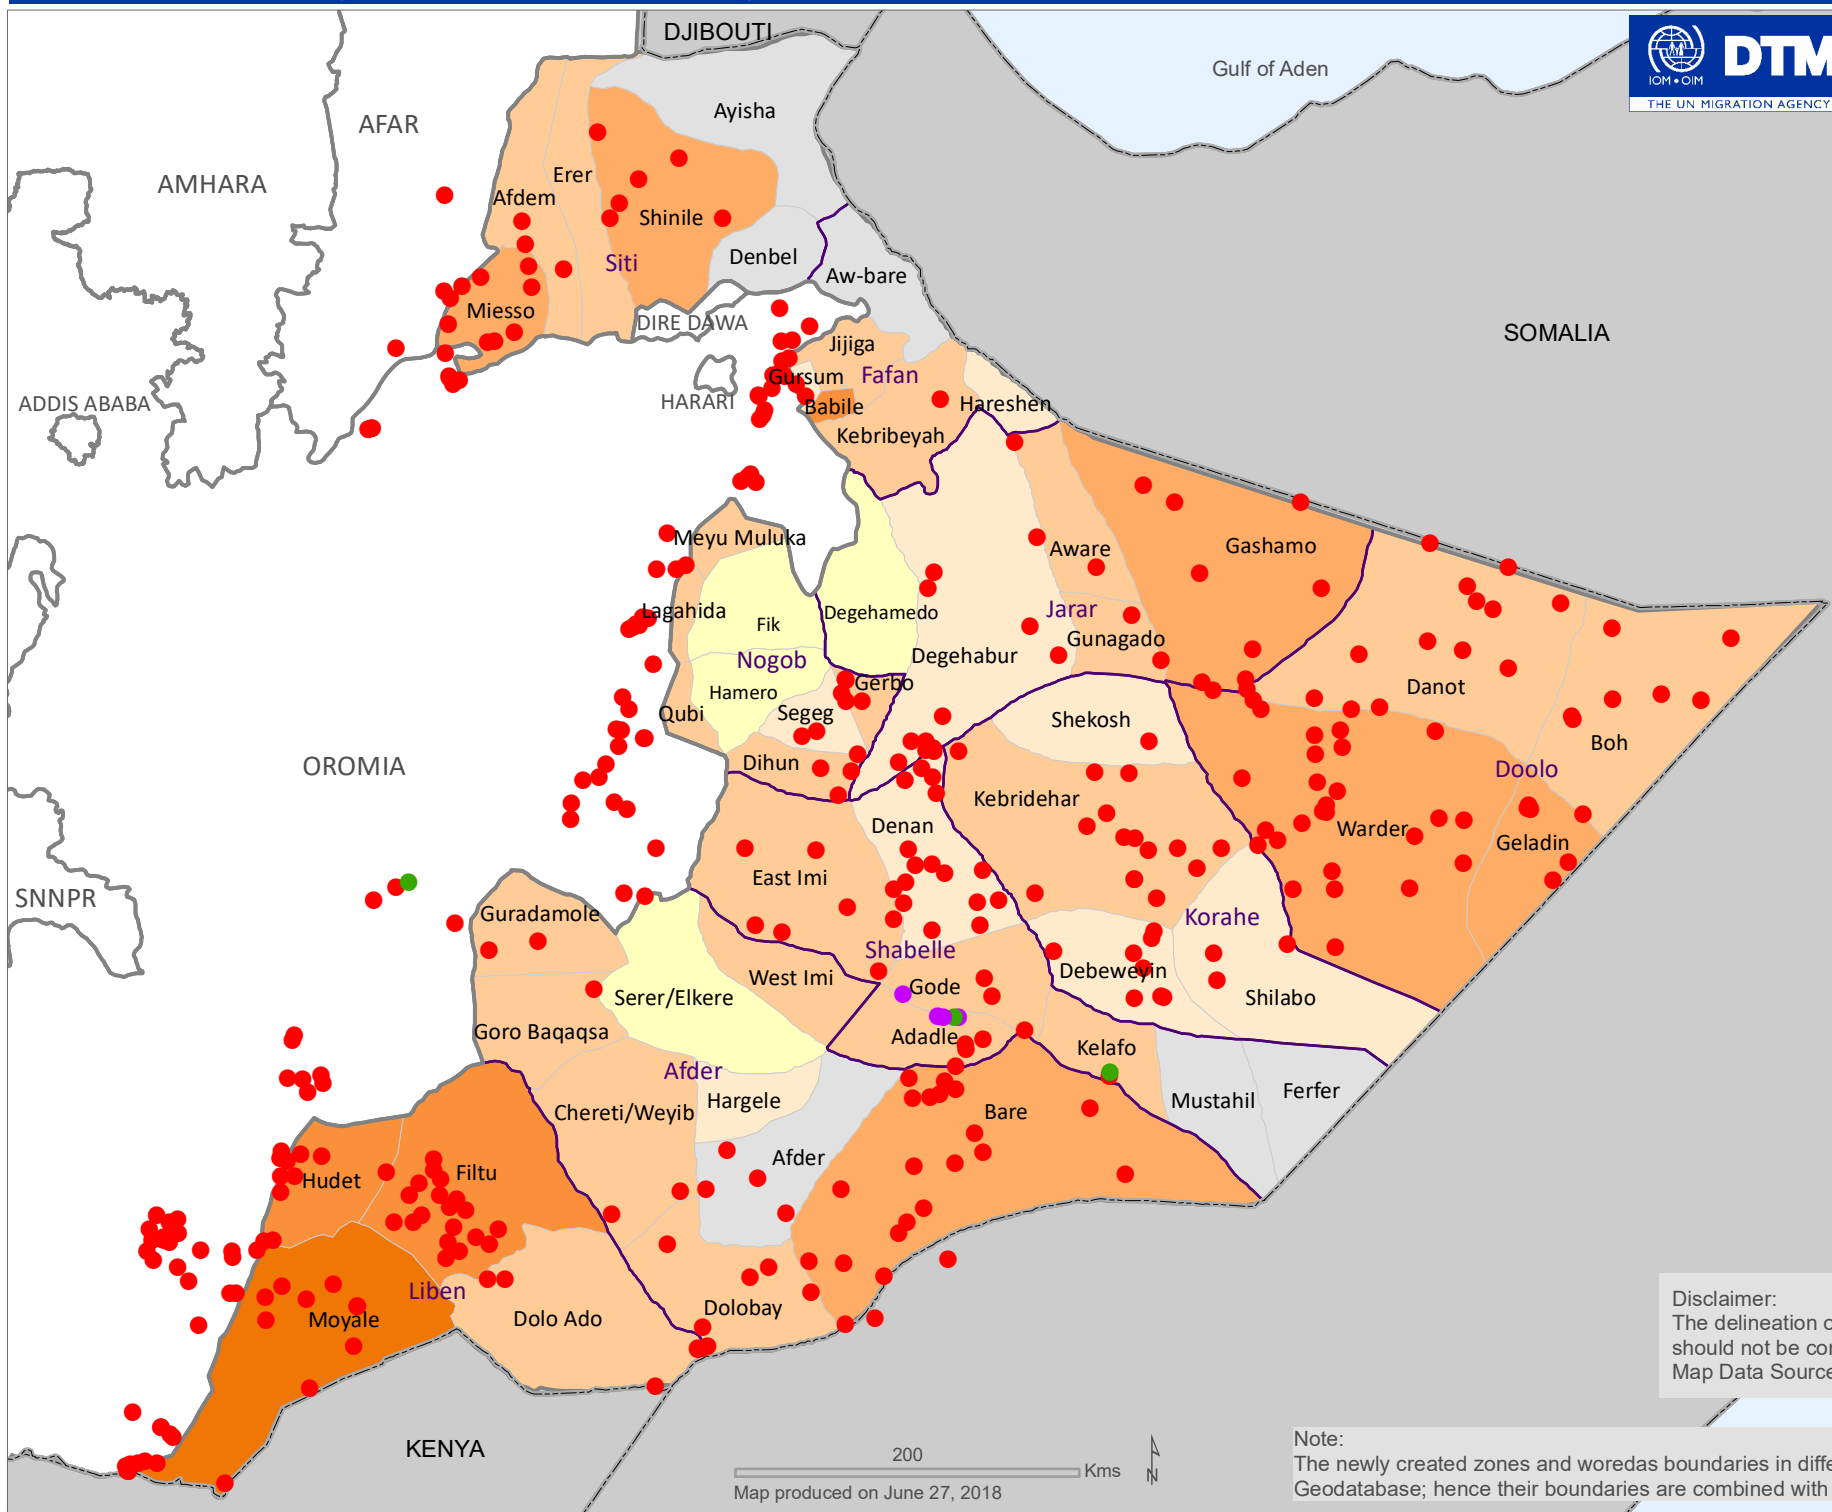

569,949 Individuals displaced within the region

303,717 Cross-regional displacement (incoming individuals)

260,418 Cross-regional displacement (outgoing individuals)

Disclaimer:
The delineation of the boundaries shown on the map should not be considered as authoritative.
Map Data Source: Boundary Shapefile - CSA 2008

Note:
The newly created zones and woredas boundaries in different regions are not available in our Geodatabase; hence their boundaries are combined with their mother zones and woredas.

Boundaries

- International Boundary
- Regional Boundary
- Zonal Boundary
- Woreda Boundary

Lack of shelter at the sites

- < 25%
- 25-50 %
- None

IDPs in assessed woredas

- 390 - 5,000
- 5,001 - 20,000
- 20,001 - 50,000
- 50,0001 - 100,000
- 100,001 - 174,435
- No IDPs
- Not assessed

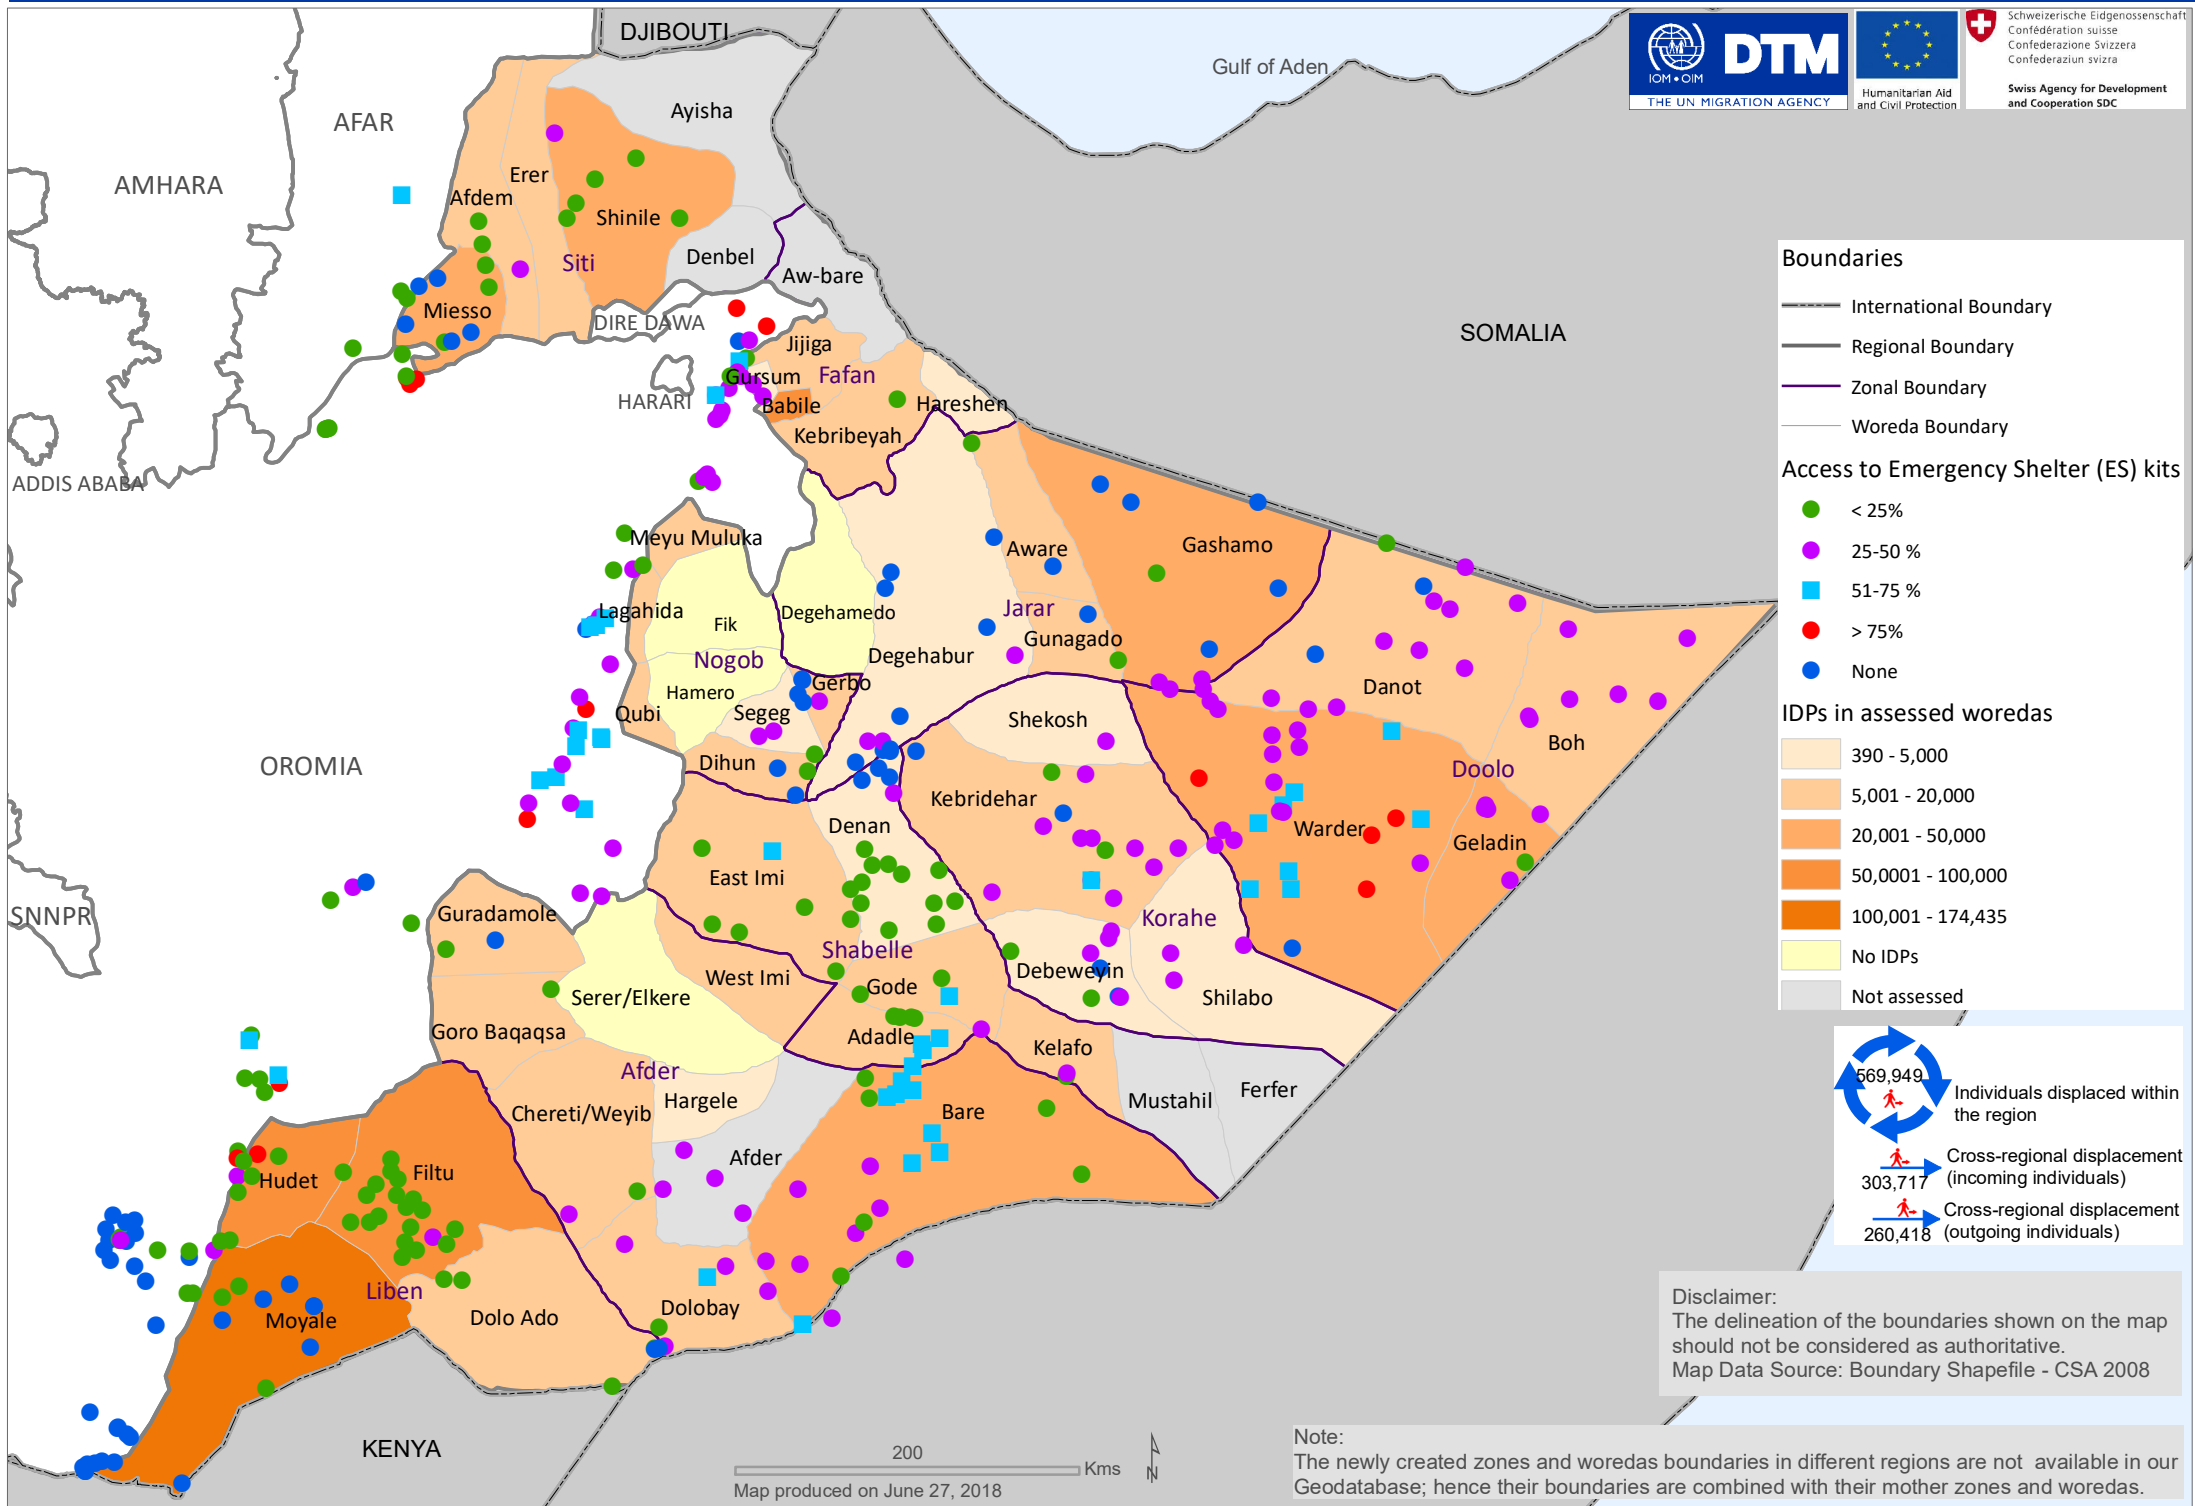

569,949 Individuals displaced within the region
