

SUMMARY

With the onset of the rainy season in Nigeria's conflict-affected northeastern State of Borno, varying degrees of damages are expected to infrastructures (self-made and constructed) in camps and camp-like settings. This is so because the rains are more often than not accompanied by very high winds and have been known to cause serious damage to properties.

On 9 June 2020, IOM's DTM program carried out an assessment to ascertain the level of damage sustained in camps and camp-like settings due to heavy windstorm and rainfall on the 8th of June 2020. Overall, 12 camps were affected in Maiduguri, Jere, Damboa and konduga LGAs. The worst-hit of the camps assessed was the Doron-Baga Camp in Maiduguri Metropolitan Council where a heavy rainfall left 50 makeshift shelters damaged, 6 damaged toilets and an estimated 500 individuals without shelter.

There is a major need of shelter, shelter repair kits, construction and sanitation materials as a preparedness measure in all camps, provision of basic NFI as well as reconstruction of damaged toilets and shower areas. No casualty was reported except in Shuwari 5 Camp in Maiduguri where 3 individuals were injured.
