

ZIMBABWE: TROPICAL CYCLONE IDAI

Return Assessment Reintegration and Recovery

Shelter Analysis

Buhera, Chimanimani & Chipinge Districts

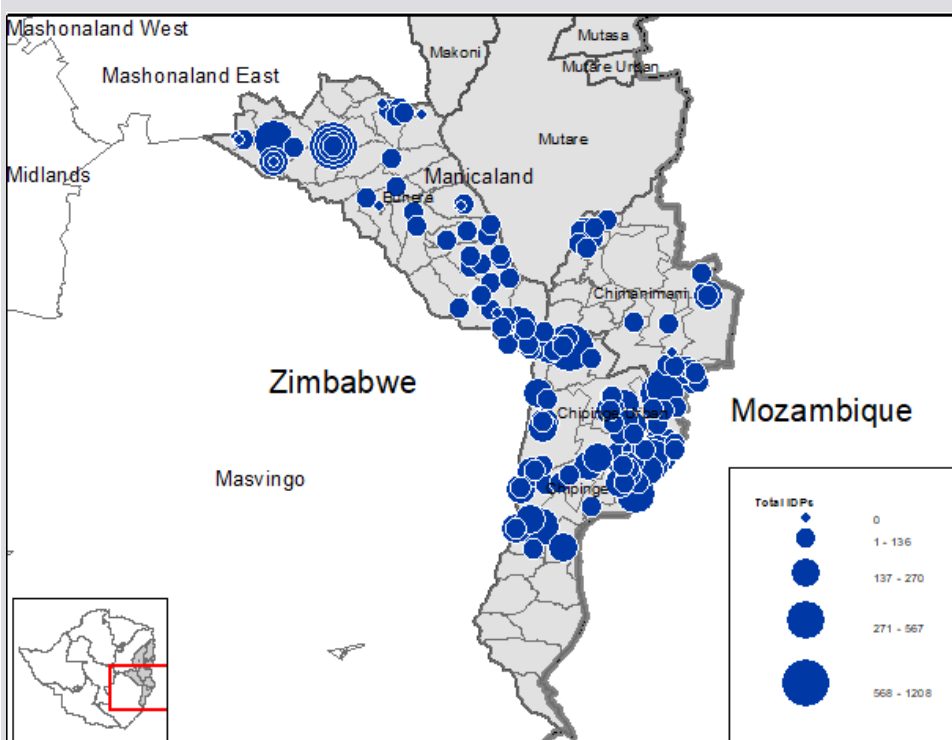

23-28 April 2020

OVERVIEW

Tropical Cyclone Idai made landfall in Zimbabwe on 15 March 2019 and the country experienced floods and sustained heavy rains. From 23—28 April 2020 IOM, in close coordination with the Government of Zimbabwe, conducted DTM multi-sectoral Return assessment in 196 villages across Chipinge, Chimanimani and Buhera districts, Manicaland province. This exercise covered 41 wards with internally displaced persons (IDPs). The following report is an analysis of the shelter displacement situation gathered from the assessment.

IDP Presence by Village

A total of **24,872** IDPs were recorded across **196** villages, **45 per cent** were males, **55 per cent** were females, **68 per cent** were children aged below 18 years and **9 per cent** were elderly aged above 60 years.

A total of **185** villages reported that IDPs are still in need of shelter assistance as shown below.
